JOURNAL OF APPLIED ELECTROCHEMISTRY 14 (1984) 807–9

Indexes to Volume 14 (1984)

The subject index has been organized into topics for easy reference.

Subject index

Corrosion and protection

Diphosphate coatings for protection of galvanized steel: quality control by impedance measurements, 537
Effect of acid and base additions on the corrosion behaviour of nickel in (Na, K) NO_3 melts, 305
Effect of halides on the corrosion behaviour of nickel in molten (Na, K)NO_3, 417
Effect of small additions of indium and thallium on the corrosion behaviour of aluminium in sea water. The, 459
Hybrid method through Faradaic rectification and a.c. impedance measurements for the corrosion rate determination of metal/oxide/electrolyte systems. II. Experimental results for anodized aluminium. A, 23
Intermittent turbulence and period doubling at the corrosion–passivity transition in iron, 623
Transpassive dissolution of iron in sulphuric acid solution, 349
Use of a clock reaction to measure the porosity of coatings on iron. The, 623

Electroanalysis, sensors, instruments

Determination of urea and carbamate herbicides using a wall jet electrode. The, 550
Dielectric characteristics of miniature aluminium electrolytic capacitors under stressed voltage conditions, 9

Electrochemical energy conversion, power sources

Aluminium as anode in primary alkaline batteries. Influence of addititves on the corrosion and anodic behaviour of 2S aluminium in alkaline citrate solution, 475
Concentration, mobility and thermodynamic behaviour of quasi-free electrons in lead dioxide, 521
Distribution of reactions in a cell with gas-evolving electrodes. I. Magnesium/silver chloride seawater battery, 15
Effect of ferric ions on the behaviour of a nickelous hydroxide electrode. The, 145
Effective conductivities of a negative electrode in an Li–Al/FeS cell at different states of charge, 755
Effective conductivities of an FeS positive in LiCl–KCl eutectic electrolyte at different states of charge, 341
Electrochemical characteristics of the lithium/carbon monofluoride battery and its component half-cells, 329
Electrochemical reactivity of aromatic compounds for use in Li cells, 721
Electrolyte absorption capacity of conducting carbon blacks used in Leclanché type batteries, 117
Evolution de l'impédance d'un générateur en fonction de son état de charge: application au système $V_2O_3/LiClO_4$ + C.P./Li, 293
Impedance of a porous electrode with an axial gradient of concentration, 437
Impedance of the Li/$SOCl_2$, BrCl primary cell. The, 47
In situ method for determination of internal resistances in fuel cells. An, 709
Influence of carbon black properties on the behaviour of the cathode of a Leclanché-type battery, 545
Model of the isotropic anode in the molten carbonate fuel cell, 135
Photoelectrochemical response of TiO_2 pigmented membranes, 495
Single and multi-layerbuilt solid electrolyte cells with a copper ion conductor, 373
Solid state electro-oxidation processes on lead and lead alloys in the $PbO_2/PbSO_4$ regions, 449
Studies of pyrrole black electrodes as possible battery positive electrodes, 285
Temperature dependence of the electrochemistry of the lithium–sulphur dioxide system. The, 765
Thermal properties of sodium–sulphur cells, 39

Electrochemical engineering, cell design and performance (see also Electrochemical mass transfer)

Applications of porous flow through electrodes. II. Hydrogen evolution and metal ion removal at packed metal wool electrodes, 357
Applications of porous flow-through electrodes. III. Effect of gas evolution on the pore electrolyte resistance, 367
Behaviour of a two-compartment stirred-tank electrochemical reactor with two anodic reactions and with continuous flows of both anolyte and catholyte. The, 769
Feasibility study of mercury deposition in a lead fluidized bed electrode. A, 277
Flow-by packed-bed electrode for removal of metal ions from waste waters. A, 595
Influence of current distribution on electrode potentials in bipolar water electrolysis cells of the 'sandwich' type, 663
Parametric study of copper deposition in a fluidized bed electrode. A, 269
Particulate vortex bed cell for electrowinning: operational modes and current efficiency. A, 615
Primary current distribution in a two-dimensional model cell composed of an electrode with an open part, 653
Quantitative assessment of bubble-curtain effects upon inter-electrode resistance of a conductimetric cell, 749
Some theoretical considerations on the design of a practical anode in an electrochemical reactor, 425
Stability and transient response of an electrolytic reactor, 231
Study of transport of hydroxyl ion in a chlor-alkali diaphragm. A, 511

Electrochemical mass transfer

Distribution of local mass transfer coefficients over one electrode bombarded by submerged multijets of electrolyte, 627
Effect of anodically evolved gas bubbles on the rate of cathodic mass transfer in a vertical cylinder cell, 693
Enhanced mass transfer at the rotating cylinder electrode. I. Characterization of a smooth cylinder and roughness development in solutions of constant concentration, 555
Enhanced mass transfer at the rotating cylinder electrode. II. Development of roughness for solutions of decreasing concentration, 565
Inhibition of diffusion controlled corrosion in pipelines by drag reducing polymers under flow conditions, 75
Mass transfer characteristics of electrochemical reactors employing gas evolving mesh electrodes, 123
Mass transfer to a rotating horizontal cylinder electrode with full and partial immersion, 675
Natural convection mass transfer at spheres, 91
Overall mass transfer between electrodes and normal impinging submerged multijets of electrolyte, 51

Electrochromic phenomena

Electrochromic properties of the *n*-heptyl viologen–ferrocyanide system, 323

Electrode kinetics, catalysis

Electrocatalysis: present and future, 403
Electrode kinetics of antimony in alkaline solutions, 257
Evolution of hydrogen on cobalt–molybdenum coating: polarization characteristics. The, 265
Hydrous oxide formation on gold in base under potential cycling conditions, 679
Lanthanum–molybdenum coating for hydrogen evolution on titanium, 131
Mechanism of oxidation of copper in alkaline solutions. The, 165
Oxygen reaction on titanium catalysed by gold, platinum and palladium, 481
Plasma-sprayed nickel cathode coatings for hydrogen evolution in alkaline electrolytes, 107
Potentiodynamic response of polycrystalline nickel electrodes in 0.5 M K_2CO_3. The, 645
Reactions at lead electrodes in 5 mol dm^{-3} H_2SO_4 near the equilibrium potential, 97
Reduction of Zr(IV) in (KCl/NaCl) eutectic (50/50 mol %) containing KF/$ZrCl_4$ in molar ratios of 6/1 or 4/1 at 750° C. Characterization of the dissolved species by IR spectroscopy, 731

Electrosynthesis

Anodic substitutions in emulsions under phase transfer catalysis conditions. I. Cyanation of dimethoxybenzenes, 741
Behaviour of oximes at a nickel black cathode, 557

Electrochemical conversion of 2,3-butanediol to 2-butanone in undivided flow cells: a paired synthesis, 197
Electrochemical oxidation of toluene promoted by OH radicals, 1
Electrolytic nickel–molybdenum–vanadium alloy coatings as a material with a decreased hydrogen overvoltage, 221
Electrolytic reduction of carbon dioxide and monoxide for the production of carboxylic acids. The, 791
Hypochlorite electro-generation. I. A parametric study of a parallel plate electrode cell, 177
Influences of the electrolyte and the physical conditions on ozone production by the electrolysis of water. The, 389
Paired electrochemical synthesis of sorbitol and gluconic acid in undivided flow cells. I. The, 209
Preliminary examination of an electrochemical process for converting olefins to ketones, 779
Preparation of dihydroxyviolanthrone with electrogenerated Mn^{+3}, 533
Use of ion exchange membranes in preparative organic electrochemistry. I. Anodic methoxylation of some olefins, 639

Metal deposition, surface finishing

Effect of additives on the electrodeposition of copper studied by the impedance technique. The, 797
Electrochemical etching of titanium alloy castings, 573
Electrodeposition of copper on copper in the presence of dithiothreitol, 489
Electrodeposition of copper–silver and copper–nickel alloy powders from aqueous ammoniacal solutions. The, 605
Electrodeposition of lead alloys from fluoborate baths, 505
Electroplating of cadmium from acidic bromide baths, 587
Preliminary investigation of the electrodeposition of iron from partially neutralized simulated spent pickle liquor. A, 554
Profilometric study of levelling in electroplating. A, 83
Studies concerning the growth of cadmium dendrites. III. Theoretical treatment, 187

Mineral electrochemistry, hydrometallurgy

Effect of germanium on zinc electrowinning from industrial acid sulphate electrolyte. The, 467
Effect of tin on zinc electrowinning from industrial acid sulphate electrolyte. The, 701
Electrodissolution de la galène en milieu sulfamique, 151
Electrodissolution de la galène en présence d'un induction magnétique inhomogène, 715
Investigation of the surface oxidation of bornite by linear potential sweep voltammetry and X-ray photoelectron spectroscopy, 63

Solid state electrochemistry, oxide films

Electrical conductivity of praseodymia doped ceria, 79
Electrochemical behaviour of the surface treated composite–electrolyte/electrode interface, 379
Electrodes minces de CdO préparées par pulvérisation réactive ('spray') ou par oxydation de cadmium déposé par métallisation sous vide. I. Préparation des films de CdO, 241
Electrodes minces de CdO préparées par pulvérisation réactive ('spray') ou par oxydation de cadmium déposé par métallisation sous vide. II. Hydratation et réduction des films de CdO, 247
Hydrogen insertion (intercalation) and light induced proton exchange at TiO_2(B)-electrodes, 315
Ionic conduction in solid solution of the system La_2O_3–CaF_2, 687
Solid state lithium concentration cell with $Li_xV_2O_5$. A, 759
Surface resistivity of different silylated glasses, 805
